Capital Improvement Projects (FY2027)**

Project Descriptions

Priority	Category	Project Name	Project Description
AK Gateway (03)			
32	Maintenance	Tok K-12 School Partial Roof Replacement	This project replaces failed roof systems at a 75,640-square-foot facility constructed in 1994, including removal and replacement of roofing components, installation of new standing-seam metal roofing, and associated structural and ventilation improvements. This project is not started.
48	Maintenance	Northway K-12 Mechanical Renovation	This project provides for renovation of aging mechanical systems in a 28,400-square-foot facility constructed between 1978 and 1985. The scope includes replacement of deteriorated domestic water piping, installation of new water treatment equipment, correction of plumbing code deficiencies, and upgrades to heating and ventilation components. This project is not started.
Aleutians East (56)			
3	Maintenance	Sand Point K-12 Major Maintenance, Supplemental	This project reimburses the district for supplemental major maintenance work to a 47,000-square-foot facility constructed in 1983 and 1984 to address unforeseen conditions discovered during ongoing renovation, including structural, mechanical, and code compliance corrections necessary to complete the project in accordance with code requirements. This project is complete.
20	Maintenance	Sand Point K-12 School Doors and Locker Replacement	This project reimburses the district for replacement of aging interior doors, frames, and hardware, as well as installation of new corridor lockers and cubbies to a 47,000-square-foot facility constructed in 1983 and 1984. The work corrects accessibility and safety deficiencies, replaces deteriorated components that have exceeded their useful life, and restores functionality to critical interior areas of the building. This project is complete.
51	Maintenance	King Cove K-12 School Piping Project	This project reimburses the district for replacement of deteriorated domestic water piping, valves, and fittings throughout the school to address chronic leaks, corrosion, and service interruptions caused by incompatible materials and aggressive water chemistry in a 43,843-square-foot facility constructed in 2007. The work will restore a reliable potable water distribution system and ensure compliance with current plumbing code requirements. This project is complete.
Anchorage (05)			
8	Construction	Kincaid Elementary School Site Improvements	This project reimburses the district for planning, design, and construction of traffic and site improvements at a 61,599-square-foot facility constructed in 1996, including revisions to site circulation, parking lots and driveways, sidewalks, lighting, site drainage, and ADA access, as well as a playground area upgrades to update equipment and play surfaces. This project is complete.

Priority	Category	Project Name	Project Description
10	Construction	Secure Vestibules, Group 3, 5 Sites	This project reimburses the district for security improvements at five facilities built between 1954 and 2010, totaling 251,520 square feet. The scope of work reconfigures existing entries to improve security; provides safety glazing; and replaces entry locks, cameras, and security system at entry. This project is complete.
11	Construction	Secure Vestibules, Group 2, 3 Sites	This project reimburses the district for security improvements at three facilities built between 1959 and 2000, totaling 176,447 square feet. The scope of work reconfigures existing entries to improve security; provides safety glazing; and replaces entry locks, cameras, and security system at entry. This project is complete.
12	Construction	Secure Vestibules, Group 1, 3 Sites	This project reimburses the district for security improvements at three facilities built between 1958 and 2010, totaling 181,413 square feet. The scope of work reconfigures existing entries to improve security and provides safety glazing. This project is complete.
13	Construction	Secure Vestibules, Group 4 North, 4 Sites	This project reimburses the district for security improvements at four facilities built between 1971 and 2000, totaling 237,862 square feet. The scope of work reconfigures existing entries to improve security and provides safety glazing and other security features. This project is complete.
14	Construction	Secure Vestibules, Group 4 South, 4 Sites	This project reimburses the district for security improvements at four facilities built between 1965 and 1996, totaling 219,062 square feet. The scope of work reconfigures existing entries to improve security; provides security glazing, installation of buzz in system, and reinforced reception desk. This project is complete.
6	Maintenance	East High School Safety Upgrades	This project reimburses the district for safety and accessibility improvements in the academic areas at a 342,568-square-foot facility constructed in 1960 and 1972 with additions in 2002 and 2005, including installation of a new fire sprinkler system, structural reinforcement, ADA restroom upgrades, fire alarm replacement, hazardous materials abatement, and installation of new energy-efficient lighting. This project is complete.
7	Maintenance	Service High School Health and Safety Improvements	This project reimburses the district for funds expended to renovate 53,491 square feet of the 283,514 square foot facility. The portion being renovated was built in 1971. The scope of work addresses architectural, structural, mechanical, and electrical systems, and will include expansion of the fire alarm and sprinkler systems. This project is complete.
11	Maintenance	Mears Middle School Heating Upgrades	This project reimburses the district for funds expended to replace the Victaulic fittings on the hydronic piping heating system. The 150,506 square foot building was built in 1985. The scope of the work includes replacing leaking Victaulic fittings, adding isolation valves, and replacing ceiling tiles in areas where there are Victaulic fittings. This project is complete.
14	Maintenance	Mears Middle School Roof Replacement	

Priority	Category	Project Name	Project Description
			This project reimburses the district for funds expended to replace roofing for the original 150,506 square foot building that was built in 1985. The scope of work includes removal of existing paver roofing, installation of EPDM membrane roofing with additional insulation; structural repair; and abatement of hazardous materials. This project is complete.
24	Maintenance	College Gate Elementary School Roof Replacement	This project reimburses the district for replacement of the existing roof system and associated structural upgrades to address leaks, deterioration, and hazardous material abatement at a 60,034 square-foot facility constructed in 1970 and 1995. The work includes removal and replacement of roofing, roof access and drainage improvements, and seismic and structural reinforcements. This project is in progress.
26	Maintenance	Campbell Elementary School Roof Replacement	This project reimburses the district for replacement of existing roof systems and associated structural upgrades to address leaks, deteriorated materials, and overstressed roof components at a 61,438-square-foot facility built between 1965 and 1995. Work includes hazardous materials abatement, storm drain repairs, and seismic improvements. This project is complete.
35	Maintenance	Kasuun and Kincaid Elementary Schools Roof Replacement	This project reimburses the district for replacement of roof systems and associated improvements to correct chronic leakage and building envelope failures affecting two prototypical elementary schools constructed 1996 totaling 123,198 square feet. Work includes roof replacement, drainage redesign, insulation upgrades, and air and vapor barrier improvements to resolve long-standing water infiltration, ice damming, and thermal loss issues. This project is complete.
38	Maintenance	Stellar Secondary School Fire Alarm	This project reimburses the district for funds expended to replace the fire alarm system in the 47,765 square foot facility originally built in 1949 with additions in 1950, 1955, and 1983. The scope of work includes installation of a new addressable fire alarm including wiring, panel, and devices. This project is complete.
47	Maintenance	Anchorage Warehouse Roof Replacement	This project reimburses the district for replacement of the existing roof assembly and associated structural upgrades, and seismic deficiencies in the 60,000 GSF facility built in 1973. Work includes removal and replacement of the built-up roof system, installation of new roof drains and fall protection, and structural improvements. This project is complete.
68	Maintenance	Bear Valley Elementary School Domestic Water Replacement	This project reimburses the district for funds expended to replace the domestic water system in the 50,160 square foot facility built in 1984. The scope of work includes replacement of the well pump, well water line, pressure tank, holding tanks, domestic water piping and fixtures, sprinkler main, and water treatment equipment. This project is complete.
83	Maintenance	Ptarmigan Elementary School Intercom Replacement	This project provides for replacement of the existing intercom and clock systems, including installation of new speakers, clocks, and associated wiring at the 59,275 GSF facility built between 1971 and 2004. This project is complete.
91	Maintenance	Facilities Support Center Roof C Replacement	This project provides for replacement of 3,840 square feet of the existing roof assembly and associated structural upgrades to address ponding, deck deflection, and roof deterioration of the

Priority	Category	Project Name	Project Description
			63,100 GSF facility built in 1976. Work includes removal and replacement of the full roof section, hazardous materials abatement, and installation of new insulation, vapor barrier, and fall protection to restore structural integrity and weather protection. This project is complete.
Bering Strait (07)			
1	Construction	Stebbins K-12 School Replacement	This project provides for replacement of the school, which was destroyed by fire in 2024 with a new 52,132 GSF facility designed to restore safe, code-compliant educational space for the community. This project is not started.
103	Maintenance	Gambell K-12 School Bulk Fuel Tank Farm Replacement	This project provides for replacement of the existing fuel tank farm ensuring safe and reliable fuel storage for school operations. The new tank farm will include 3 tanks with a total capacity of 90,000 gallons. This project is not started.
Copper River (11)			
88	Maintenance	Kenny Lake High School Fire Suppression System Replacement	This project involves one facility with a total GSF of 33,170 originally built in 1977. The scope involves replacing the obsolete antifreeze-based fire sprinkler system with a new wet-pipe and dry-pipe system to meet current NFPA 13 standards. This project is not started.
Craig City (13)			
1	Maintenance	Craig Elementary and Middle Schools Rehabilitation, Supplemental	This project reimburses the district for funds expended to replace failed heating equipment and repair concealed structural deterioration discovered during renovation of the 43,221 GSF facility originally built in 1981. Work includes mechanical and structural improvements. This project is complete.
Denali Borough (02)			
4	Maintenance	Tri-Valley School Septic System Upgrades	This project involves one facility with a GSF of 50,966 originally built in 1972. The scope includes replacement of a failed on-site wastewater system that has exceeded its service life and no longer meets Alaska Department of Environmental Conservation standards. Work includes installation of a new 6,000-gallon baffled septic tank and leach field, and new sewer piping. This project is in progress.
17	Maintenance	Districtwide Electrical Code Upgrades	This project involves three schools and three support buildings with a total GSF of 116,628 built between 1972 and 1999. The scope includes districtwide replacement of electrical distribution equipment. This project is not started.

Priority	Category	Project Name	Project Description
37	Maintenance	Generator Replacement, 2 Schools	This project involves two schools built between 1973 and 1994 with a total square footage of 62,070. The scope includes replacement of backup power systems. This project is not started.
Fairbanks (16)			
8	Maintenance	North Pole High School Mechanical and Electrical Upgrades	This school was built in 1984 with a GSF of 156,362. The scope of the project includes upgrades to the mechanical and electrical systems. This project is not started
15	Maintenance	Arctic Light Elementary School Exterior Renovation	This school was built in 1993 with a GSF of 68,272. This project provides for replacement of aging building envelope systems that have exceeded their service life. Work includes new roofing and other exterior envelope improvements. This project is not started.
53	Maintenance	Weller Elementary School Renovation	This school was built in 1983 with a GSF of 65,259. This project provides for comprehensive renovation and replacement of aging building systems and interior spaces that have exceeded their service life. Work includes replacement of mechanical, plumbing, and control systems. This project is not started.
73	Maintenance	Woodriver Elementary School Mechanical Renovation	This school was built in 1976 with a GSF of 64,408. This project provides for replacement of aging mechanical and electrical systems that have exceeded their service life. This project is not started.
78	Maintenance	Howard Luke High School Exterior Renovation	This school was built in 1989 with a GSF of 30,856. This project provides for replacement of deteriorated exterior envelope systems. This project is not started.

Priority	Category	Project Name	Project Description
84	Maintenance	Ticasuk Brown Elementary School Mechanical Renovation	This school was built in 1987 with a GSF of 63,761. This project involves replacing mechanical, plumbing, and electrical systems. This project is not started.
86	Maintenance	University Park Elementary School Classroom Upgrades	This school was built in 1989 with a GSF of 64,699. This project involves replacing aging classroom finishes, interior components, and building systems that have reached the end of their service life. Work includes upgrades to flooring, wall finishes, partitions, cabinetry, interior doors, and classroom storage, along with replacement of obsolete DDC controls, outdated plumbing fixtures, and the aging fire alarm system. This project is not started.
95	Maintenance	Anderson Crawford Elementary School Exterior Renovation	This school was built in 1997 with a GSF of 63,532. This project involves replacing exterior building systems that have reached the end of their service life, including the roofing system, exterior cladding, windows, exterior doors, and related envelope components. Work also includes improving roof drainage, upgrading exterior insulation, and installing energy-efficient lighting. This project is not started.

Galena City (17)

2	Maintenance	Sidney C Huntington Elementary and High Schools Renovation	This project renovates two connected school facilities totaling 50,150 GSF, constructed between 1976 and 1985. The work replaces end-of-life structural, mechanical, electrical, and architectural systems, including the roof, exterior envelope, HVAC, plumbing, lighting, and required ADA and egress upgrades, along with essential interior finish and site improvements. Hazardous materials will be abated where demolition occurs. The project is not started.
---	-------------	---	--

Haines (18)

31	Maintenance	Haines High School Locker Room Renovation	This project involves a single facility with a GSF of 10,141, constructed between 1970 and 1982. The scope includes mechanical and electrical improvements. Additionally, the project covers updating wall and ceiling finishes, repainting all surfaces, and addressing egress issues. This project is not started.
33	Maintenance	Haines High School Roof Replacement	This project involves one facility with a GSF of 45,323 that was built in 1970. The scope of this project includes Phases 2 and 3, which involve replacing the roof. Phase 1 was completed in 2022. This project is in progress.

Priority	Category	Project Name	Project Description
Iditarod (21)			
5	Maintenance	Blackwell K-12 School Renovation, Anvik, Supplemental	This project involves a single facility with a GSF of 8,240, built in 1979. The scope includes structural, roof, and exterior improvements. This is Phase 3 of a three-phase project. This project is partially complete.
66	Maintenance	McGrath and Nikolai Schools Heating System Replacement	This project renovates 40,331 square feet of school facilities at McGrath and Nikolai by replacing heating and ventilation systems. Work includes installing a new boiler at McGrath and complete ventilation system replacements at both schools. This project is not started.
76	Maintenance	McGrath K-12 School Roof Replacement	This project impacts one facility built between 1964-1981 with a total GSF of 31,000. The scope of work for this project includes replacement of the roof system along with the gutters/downspouts. Project is not started. This project is not started.
Juneau City & Borough (22)			
71	Maintenance	Dzantik'i Heeni School Roof Replacement	This project reimburses the district for funds expended to replace the original asphalt shingle and membrane roofing of the 105,000 square foot school built in 1994. The scope of work includes demolition of roof assemblies to the existing structure, increased insulation, and installation of new roofing assemblies and associated appurtenances including a new parapet wall around the perimeter. This project is complete.
82	Maintenance	Riverbend Elementary School Roof Replacement	This project reimburses the district for funds expended to replace the roof of the 57,493 square foot school built in 1997. The scope of work includes demolition of roof assemblies to the existing structure and installation of new asphalt composition shingle roofing assemblies and associated appurtenances. This project is complete.
Kake City (23)			
50	Maintenance	Kake Career and Technical Education Building Rehabilitation	This project renovates the 5,000 SF Kake High School Career and Technical Education (CTE) Building, originally constructed in 1976. Building systems including the roof, siding, insulation, HVAC, plumbing, electrical distribution, and interior finishes will be improved. This project is not started.
87	Maintenance	Kake High School Plumbing Replacement	This project involves a single facility with a GSF of 53,100, built in 1973. The scope includes replacing all water supply-related piping and fittings, demolishing existing interior finishes for new piping installation, and abating hazardous materials. This project is not started.
Kashunamiut (55)			
18	Maintenance	Chevak K-12 School Campus Renovation	This project involves one facility built in 2003 with a total GSF of 75,379. The scope includes replacing aging building systems that have reached the end of their service life, including windows, site upgrades, structural repairs, glazing, exterior doors, flooring, DDC controls, the fire alarm system, and the PA system. The project is not started.

Priority	Category	Project Name	Project Description
Kenai (24)			
9	Construction	Kenai Middle School Security and Kitchen Remodel	This project reimburses the district for funds expended. This project involves one facility with a GSF of 85,476 that was built in 1972. The scope of work for this project includes demolition of interior partitions, demolition of suspended ceiling, demolition of flooring construction of interior partitions, construction of storefront, and abatement of asbestos boards. This project is complete.
10	Maintenance	West Homer Elementary School North Wall Improvement	This project reimburses the district for funds expended. This project involves one facility with a GSF of 52,500 that was built in 1996. The scope of work for this project includes installation of an exterior furred rain screen siding system, rebuilding a parapet wall, replacing windows and repair interior damaged finishes. This project is complete.
Ketchikan (25)			
12	Maintenance	Schoenbar Middle School Drainage and Gym Floor Replacement	This project reimburses the district for funds expended. This project involved a 66,048 GSF facility built between 1964-1984. The existing gym floor and associated concrete slab were removed and replaced. This project is complete.
56	Maintenance	Valley Park and Pt. Higgins Elementary Schools Playground Upgrades	This project involves two facilities with a total GSF of 96,302 that were built between the years 1973-1986. The scope of this project includes replacement of new playground equipment and installation of new safety surface. This project is not started.
69	Maintenance	Districtwide School Security Upgrades	This project reimburses the district for funds expended. This project involves multiple facilities with a total aggregate GSF of 287,578 that were built between the years 1960-2005. The scope of work for this project includes installation of access control system and installation of surveillance cameras and video management system. This project is complete.
79	Maintenance	Information and Alert System Replacement, 4 Sites	This project involves four facilities with a total GSF of 351,326 that were built between the years 1954-2005. The scope of this project includes decommissioning the existing information system and installing a new communication system (PA, bell, clock, and two-way communication). This project is not started.
Klawock (27)			
34	Maintenance	Klawock School Gymnasium Roof Replacement	This project involves one facility with a GSF of 14,100 that was built in 1972. The scope of this project includes installation of a new roof. This project is not started.

Kodiak Island Borough (28)

40	Maintenance	Fire Alarm Upgrades, 5 Sites	This project involves five facilities with a total GSF of 72,462 that were built between the years 1962-2010. The scope of this project includes replacing the fire alarm systems with modern addressable fire alarm systems with voice evacuation capabilities. This project is not started.
41	Maintenance	Main Elementary School Roof Replacement	This project involves one facility with a GSF of 37,830 that was built in 1983. The scope of this project includes installation of a new roof. This project reimburses the district for funds expended. This project is complete.
63	Maintenance	Chiniak K-12 School Water Code Compliance and Upgrade	This project involves one facility with a GSF of 8,500 that was built in 1984. Scope of work includes upgrading existing shallow well system with multi-barrier treatment, installing new storage/holding tank if needed, ensuring compliance with NTNCWS classification including operator training/certification, and bidding all upgrades as a single contract. This project is not started.
85	Maintenance	East Elementary School Roof Replacement	This project involves one facility with a GSF of 19,310 that was built between 1983 and 2011. The scope of this project includes installation of a new roof. This project is partially complete.

Kuspuk (29)

- | | | | |
|----|--------------|---|---|
| 3 | Construction | Jack Egnaty Sr. K-12 School Replacement, Sleetmute | This project involves one facility with a GSF of 10,278 that was built in 1979. The scope of work includes constructing a new 9,000 GSF school and demolishing the existing school after occupancy of the new school. This project has not started. |
| 21 | Maintenance | Bob R. McHenry District Office Energy Upgrades | This project involves one facility with a GSF of 11,500 that was built in 1987. The scope of work for this project includes improvements to the exterior, electrical, and mechanical systems. This project is not started. |

Lake & Pen (30)

- | | | | |
|---|-------------|--|--|
| 9 | Maintenance | Fire Suppression System Upgrades, 4 Sites | This project includes four facilities with a total GSF of (to be officially determined) that were built between the years 1979-1998. The scope of work for this project includes installation of new fire water tanks at each site and mechanical upgrades. This project is not started. |
|---|-------------|--|--|

Lower Kuskokwim (31)

- | | | | |
|----|--------------|---|---|
| 4 | Construction | Nelson Island K-12 School Renovation/Addition, Toksook Bay | This project includes one facility with a total GSF of 30,555 built in 1975 and an addition built in 2007. The scope of work includes phased delivery of the Nelson Island School Renovation project covering design, renovation, construction of additional space, and demolition. This project is not started. |
| 5 | Construction | Anna Tobeluk Memorial K-12 School Replacement, Nunapitchuk | This project involves one facility with a total GSF of 32,610 originally built in 1980 with an addition in 1994. The scope of work includes full replacement of Anna Tobeluk Memorial School with a new two-story, 39,667 GSF K-12 facility. This project has not started. |
| 7 | Construction | Rocky Mountain K-12 School Renovation/Addition, Goodnews Bay | This project involves one facility with a total GSF of 18,090 originally built in 1980 with an addition in 1985. The scope of work includes construction of a new 27,264 GSF K-12 school. This project has not started. |
| 28 | Maintenance | Nuniwaarmiut K-12 School Renovation, Mekoryuk | This project involves one facility originally built in 1980 with a total GSF of 17,200. The scope includes structural, mechanical, and site improvements. This project has not started. |
| 30 | Maintenance | Akula Eliitnavik K-12 School Renovations, Kasigluk-Akula, Supplemental | This project involves one facility with a total GSF of 22,940 originally built in 1982. Scope of work includes structural repairs and upgrades to main school, architectural renovations, mechanical and electrical upgrades, and similar structural and interior repairs for K-3 school. This project has not started. |

Priority	Category	Project Name	Project Description
42	Maintenance	Akiuk Memorial K-12 School Renovation, Kasigluk-Akiuk	This project involves one school facility with a total GSF of 19,988 originally built in 1995 and a small vocational education building originally built in 1970. The scope of work includes installing a fire sprinkler system, mechanical upgrades, and site improvements. This project has not started.
77	Maintenance	Qugcuun Memorial K-12 School Renovation, Oscarville	This project involves one facility with a total GSF of 4,691 built in 1986. The scope of work includes utility upgrades, replacing some interior and exterior elements, and mechanical and electrical upgrades. This project has not started.
80	Maintenance	Water Storage and Treatment, Kongiganak	This project involves one facility with a total GSF of 31,752 built in 2010. The scope of work includes demolition of the existing 100,000-gallon water tank and arctic pipe, construction of a new 540,000-gallon insulated tank, and mechanical upgrades. This project has not started.
99	Maintenance	Kwigillingok K-12 School Fire Suppression System Replacement	This project involves one facility with a total GSF of 30,388 originally built in 1979 with additions in 1987 and 2015. The scope of work includes demolition and replacement of wet and dry sprinkler piping in the Elementary/Middle School and compromised piping in the High School. This project has not started.
101	Maintenance	Z John Williams Memorial School Bulk Fuel Storage Replacement, Napaskiak	This project involves one facility with a GSF of 41,195 built in 2016. The scope of work includes removal and disposal of three existing fuel tanks and associated piping, installation of new double-wall aboveground tanks totaling 45,000 gallons, and mechanical upgrades. This project has not started.
Lower Yukon (32)			
19	Maintenance	Marshall K-12 School Emergency Tank Farm Repair	This project reimburses the district for funds expended to repair and upgrade the tank farm serving the 41,487 square foot school built in 2010. Scope of work included installation of a pile foundation, steel platform, fencing, and access. The existing pump house was relocated, and existing power, lighting, and controls systems were modified. This project is complete.
29	Maintenance	Hooper Bay Emergency Tank Farm Pad Repair	This project reimburses the district for funds expended. This project includes one tank farm with 5 30,000-gallon tanks, for a total of 150,000 gallons, that were installed in 2006. The scope of work for this project includes replacement of tanks and structural improvements. This project is complete.
81	Maintenance	LYSD Maintenance Building Renovation	This project includes one facility with a GSF of 1,749 built in 1982. The scope of work for this project includes replacing the existing metal roof, electrical and interior finishes improvements, and installing a new addressable fire alarm system. This project has not started.

Priority	Category	Project Name	Project Description
94	Maintenance	Kotlik and Pilot Station K-12 Schools Renewal and Repair	This project includes two facilities, totaling 86,112 GSF, both constructed in 2002. The scope includes installing new door hardware, replacing flooring, installing new drywall, adding exterior skirting, and restoring interior finishes. This project is not started
96	Maintenance	Sheldon Point K-12 School Exterior Repairs, Nunam Iqua	This project includes one facility with a GSF of 20,530 that was built in 2008. The scope of work for this project includes envelope improvements. This project has not started.
Mat-Su Borough (33)			
45	Maintenance	Elevator Code and Compliance Upgrades, 2 Sites	This project involves two facilities with a total GSF of 325,058 built between 1953-1995. The scope of work includes full modernization of elevator systems at Palmer Middle and High Schools, including installation of new ADA-compliant elevators, controls, and signaling devices; correction of fire safety and ventilation issues, and electrical and structural upgrades to support new equipment. This project has not started.
62	Maintenance	Boiler Replacement, 3 Sites	This project involves 3 facilities with a total GSF of 446,842 built between 1976-2002. The scope of work includes replacing boiler systems and controls at Palmer High School, Wasilla High School, and Snowshoe Elementary. This project is partially completed, with two of the three boilers already being replaced.
67	Maintenance	Colony Middle School Roof Replacement	This project involves one facility with a GSF of 120,000 built in 1988. The scope of work is to assess the full extent of required work, remove failing systems, and replace them. This project has not started.
74	Maintenance	HVAC Control Upgrades, 4 Sites	This project involves four facilities with a total GSF of 536,020 built between 1976-1988. The scope of work for this project includes mechanical system improvements. This project has not started.
75	Maintenance	Generator Replacement, 3 Sites	This project involves three facilities with a total GSF of 152,557 built between 1983-1986. The scope of work for this project includes electrical upgrades. This project has not started.
89	Maintenance	Wasilla Middle School Partial Roof Replacement	This project involves one facility with a GSF of 30,000 built in 1995. The scope of work for this project includes envelope upgrades. This project has not started.
90	Maintenance	Talkeetna Elementary School Roof Replacement	This project involves one facility with a total GSF of 28,595 built between 1964-2000. The scope of work for this project includes envelope upgrades. This project has not started.

Priority	Category	Project Name	Project Description
92	Maintenance	Boiler and Boiler Control Upgrades, 6 Sites	This project involves six facilities with a total GSF of 277,722 built between 1962-2009. The scope of work for this project includes mechanical system upgrades. This project has not started.
98	Maintenance	Seismic Upgrades, 14 Sites	This project involves 14 facilities with a total GSF of 575,031 built between 1953-1995. The scope of work for this project includes removing and replacing ceiling tile grid systems and fire sprinkler heads. This project has not started.
Nenana (34)			
13	Maintenance	Nenana School Boiler Replacement	This project includes one facility with a total GSF of 62,052 that was built between 1955-1986. The scope of this project includes mechanical system upgrades associated with replacing boilers. This project is not started.
49	Maintenance	Nenana School Fire Suppression System Replacement	This project includes part of one facility for a total GSF of 44,272 that was built between 1972-1986. This project scope includes the installation of a new dry pipe sprinkler system in the high school and gym additions. This project is not started.
Northwest Arctic (37)
